Subject: REACH regulation assessment

Ref: REACH-35-2022

Dear Madam or Sir,

On December 18, 2006, the Council of the European Union adopted the final text of 1907/2006 REACH regulation. This text relating to chemical substances and dangerous preparations is designed to better protect the health of humans as well as the environment. This regulation entered into force on June 1, 2007.

EATON - SOURIAU, aware of the various obligations arising out of this regulation, has implemented a monitoring process.

EATON - SOURIAU conducted an inventory of substances, mixtures and articles that we use or manufacture, as well as their origin. At the end of this analysis and in view of REACH regulation, EATON - SOURIAU must be considered as a user of substances, but the articles it produces, when used normally, are not intended to release substances.

In accordance with article 33 of the REACH regulation, EATON - SOURIAU is required to inform its customers about any item manufactured or sold with a concentration of substances exceeding 0.1% weight by weight, according to the candidate list dated **June 13th, 2022 (224 substances)**. Souriau will transmit the necessary information within a period of 45 days.

Cadmium (CAS No.: 7440-43-9 - EINECS No: 231-152-8) has been put on this candidate list (June 20, 2013), and as a result, some cadmium plated EATON - SOURIAU connector ranges are impacted where a concentration limit of 0.1% weight by weight is exceeded.

Lead (CAS N° .: 7439-92-1 - EINECS No .: 231-100-4) was entered on the candidate list of June 27, 2018. Some EATON - SOURIAU connector series are impacted. Lead is a component of bronze, copper alloys, solder alloys. This substance may be present at a concentration greater than 0.1% w / w in our articles.

Following the publication of Regulation 348/2013 / EU, the use of hexavalent chromium (Cr VI) is not allowed in the European Union without obtaining an authorization of use since September 21, 2017.

EATON - SOURIAU, member of CMG "Connectors Manufacturers Group" submitted on February 22, 2016, a joint application for authorization for the use of chromium VI compounds beyond the Sunset Date, to ECHA

On June 15, 2018, the European Commission has issued its decision on marketing authorizations for the use and / or use of substances listed in Annex XIV to Regulation (EC) No 1907/2006 of the European Parliament and of the Council concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH), namely:

For chromium trioxide: CAS No : 1333-82-0 EINECS No : 215-607-8
• **See annex I**

For sodium dichromate: CAS No : 10588-01-9 EINECS No : 234-190-3
• **See annex II**

These opinions are available:

• On the ECHA website:
